

# Certified ScrumMaster

Practical, project proven practices for success

The two-day Certified ScrumMaster course provides a clear understanding of the fundamental principles of Scrum and gives participants hands-on experience using Scrum through liberal use of exercises and discussion.

During the course, attendees will learn why Scrum's seemingly simple process can have profound effects on an organization. Participants will gain practical experience working with Scrum tools and activities, including the product backlog, sprint backlog, daily scrum meetings, sprint planning meeting, and burndown charts.

Whether you're new to Scrum or an experienced Scrum Master, you will leave with new ideas that will help your team succeed.

Following successful completion of this course, participants will be eligible to take the CSM test, the final step toward earning the Certified ScrumMaster designation, and given a two-year membership in the Scrum Alliance

## You Will Learn

- ✓ Practical, project-proven practices
- ✓ The essentials of getting a project off on the right foot
- ✓ The principles of scaling Scrum for success on large projects
- ✓ Why there's more to leading a self-organizing team than buying pizza and getting out of the way
- ✓ How to help both new and experienced teams be more successful
- ✓ How to write user stories for the product backlog
- ✓ Tips and strategies for adopting the best practices of the highest-performing Scrum teams worldwide.
- ✓ Tips and tricks from the instructor's fifteen years of using Scrum in a wide variety of environments
