

# Certified ScrumMaster

## AGENDA

Scrum Origins  
Scrum Roles  
Scrum Metrics  
Product Backlog  
User Stories  
Estimating  
Sprint Backlog  
Sprint Planning  
Managing the Sprint  
Retrospectives  
Release Planning

The two-day Certified ScrumMaster course provides a clear understanding of the fundamental principles of Scrum and gives participants hands-on experience using Scrum through liberal use of exercises and discussion.

During the course, attendees will learn why Scrum's seemingly simple process can have profound effects on an organization. Participants will gain practical experience working with Scrum tools and activities, including the product backlog, sprint backlog, daily scrum meetings, sprint planning meeting, and burndown charts.

Participants leave knowing how to apply Scrum to all sizes of projects, from a single collocated team to a large, highly distributed team.

Following successful completion of this course, participants will be eligible to take the CSM test, the final step toward earning the Certified ScrumMaster designation, and given a two-year membership in the Scrum Alliance.

**This course earns you 15 PDUs within the PMI. This course also earns you 16 SEUs (Category B) within the Scrum Alliance. PDUs and SEUs can be used toward PMP, PMI-ACP, CSP and other certifications.**

## You Will Learn

- ✓ Real world practices in Scrum that are proven to make your teams more productive
- ✓ The fundamentals of launching a project with Scrum the right way
- ✓ How to write user stories for the Scrum product backlog
- ✓ Understanding how to lead a self-organizing team
- ✓ Applying solutions to the challenges that both new and experienced Scrum teams face
- ✓ Tips and strategies for adopting the best practices of the highest-performing Scrum teams worldwide
